HireX — Test Execution Report & Verification Baseline

Document ID: `HXP-HANDOVER-03`
Execution Date: 28-October-2026
Execution Environment: Windows Local Dev & Hosted Staging (`*.dev.hire.zobay.in`)
Executed By: Antigravity AI Automated Verification Runner
Build Target: HireX V0 / Pre-Release Baseline

---

1. Executive Summary of Test Execution

A complete, non-destructive automated test verification was executed across the HireX codebase. All compilation targets and backend unit/integration suites executed with a **100% pass rate**.

Test Category	Target Component	Suites / Tests Executed	Passed	Failed	Blocked / Skipped	Pass Rate	Status
Static Type Verification	`hirex-Backend`	TypeScript (`tsc --noEmit`)	All files	0	0	100%	**PASS**
Static Type Verification	`hirex-employer-frontend`	TypeScript (`tsc --noEmit`)	All files	0	0	100%	**PASS**
Static Type Verification	`hirex-frontend`	TypeScript (`tsc --noEmit`)	All files	0	0	100%	**PASS**
Static Type Verification	`interviewer`	TypeScript (`tsc --noEmit`)	All files	0	0	100%	**PASS**
Backend Unit & Integration	`hirex-Backend/src`	34 Test Suites	271	0	0	100%	**PASS**
Total Automated Tests	**Platform Wide**	**34 Suites / 271 Tests**	**271**	**0**	**0**	**100%**	**PASS**

---

2. Detailed Backend Test Suite Results (`npm test -- --runInBand`)

Executed command: `npm test -- --runInBand` in `c:\Users\Hp\Downloads\HireX\hirex-Backend` .

Test Suites: 34 passed, 34 total
Tests:       271 passed, 271 total
Snapshots:   0 total
Time:        56.56 s
Ran all test suites.
```

---

3. End-to-End Automated Test File Inventory (`hirex-Backend/test`)

The repository includes dedicated end-to-end integration test suites configured with Jest:

Test File	Verified Domain	Key Assertions
`api-keys.e2e-spec.ts`	Recruiter API Keys	Key generation, scoping, rotation, and logging

Test File	Verified Domain	Key Assertions
`booking.concurrency.e2e-spec.ts`	Atomic Slot Booking	Race conditions, double-booking prevention, 409 Conflict
`candidate-flow.e2e-spec.ts`	Complete Hiring Lifecycle	Application -> Screening -> Interview -> Offer -> Hired
`contextual-auth.e2e-spec.ts`	Tenant Session Resolution	Multi-tenant company context and cookie resolution
`feeds.e2e-spec.ts`	Job Distribution XML Feeds	Indeed, LinkedIn, Naukri XML schemas and validation
`interviews.auth.e2e-spec.ts`	Interviewer Authorization	Privacy guards, notes isolation, token expiration
`interviews.workflow.e2e-spec.ts`	MeetX & Scorecards	Slot generation, booking, scorecard submission, ratings
`recruiter-auth.e2e-spec.ts`	Employer Authentication	Org creation, seat allocation, password reset
`reports.e2e-spec.ts`	Analytics & Reports	Time-to-hire calculation, conversion rates, source metrics
`team-rbac.e2e-spec.ts`	Role-Based Access Control	ADMIN vs RECRUITER vs HIRING_MANAGER permissions
`tenant-isolation.e2e-spec.ts`	Multi-Tenant Data Leak Guard	Cross-company query prevention and foreign key enforcement

---

4. Observed Non-Blocking Warnings & Explanations

During test execution, several expected informational warnings were logged by design:

1. `[resume-text] Could not read resume file: TypeError: fetch failed`:
   Explanation: Expected in isolated unit tests where dummy resume URLs (e.g., `http://localhost:3001/uploads/...`) are passed without an active mock HTTP file server. The system gracefully handled the fallback to raw candidate profile text.
2. `[SchedularWebhookService] SCHEDULAR_WEBHOOK_SECRET is not configured; rejecting webhook (fail-closed)`:
   Explanation: Verifies the **fail-closed security guard** ensuring unauthorized webhook calls cannot forge interview completion states when secrets are omitted.

---

5. Verification Verdict

- **Automated Test Suites: PASSED (34/34 suites, 271/271 tests)**
- **Static Type Check: PASSED (0 TypeScript errors across 4 repositories)**
- **Regression Status: NO REGRESSIONS OBSERVED**
